

**Réunion des juges experts OMJ/COM Canaris de Posture
Allemands, Anglais, Belges, Espagnols, Français, Italiens, Hollandais, Portugais
en mars 2006 à Massy Palaiseau (France)**

These standards have been compiled in accordance with the descriptions made available by specialists from the breeds' country of origin.

Only the countries of origin have the authority to regulate the development of their breeds.

This unique rule is only applicable to Type canaries where each breed is the result of a completely different development and not from the occurrence of a mutation.

The aim of the O.M.J. is to consolidate the standards for the benefit of judges and canary fanciers of all C O.M. member countries.

It is in this spirit that this task has been undertaken.

Président O.M.J.

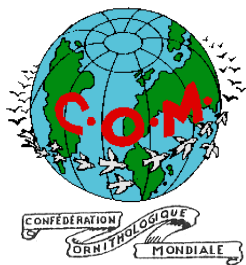

Pierre Groux

BELGIAN CANARY

Position 40	In the working/show position the bird extends its neck forward, pulls itself slightly on its legs and raises its shoulders, adopting the shape of the figure "7". The head should not be visible when viewed from behind. The back forms a straight line with the tail. The legs should be slightly angled.
Shape 25	Breast: long and broad, triangular in shape, when viewed from back and side. Back: full, broad without being too hollow nor round. Shoulders: broad and high. Wings: long, close fitting to the body.
Head Neck 12	Head: small, oval. Neck: long and slim.
Plumage 8	Smooth-feathered. All colours are allowed except red.
Size 5	17 – 18 cms
Legs 5	Legs: long, slightly angled, well feathered. Thighs well set into the body.
Tail 5	Long, straight and narrow. The tail and back form one straight line.

Show cage: Tunnel type show cage with 2 round perches 12mm in diameter (1 above and 1 below).

BERNOIS

Position Size 25	Proud and erect. Size: 16 cm maximum
Head Neck 20	Head: short and broad, flat on top, with protruding forehead. Neck: moderately long and well discernible.
Breast, shoulders and back 20	Breast full and well developed, broad shoulders, long back, body long and in the shape of a keel.
Wings Tail 10	Wings long and close fitting to the body. Tail long and narrow in line with back.
Legs and thighs 10	Thighs halfshowing and smooth feathered, legs very long and slightly angled.
Plumage and colours 10	Dense feathering, fine and close fitting to the body. All colours are allowed except red.
Condition 5	Clean and healthy.

Show cage: Tunnel type show cage with 2 round perches 12mm in diameter (1 above and 1 below).

BERNER

BORDER FANCY

Body 15	Well-filled and nicely rounded running in a smooth downward curve from the gentle, smooth rise over the shoulders to the point of the tail. The chest also nicely rounded, but not heavy. The line of curve to the root of the tail always being downwards. Viewed from above and behind the body outline should be symmetrically pear-shaped.
Colour 15	Rich, soft and pure, as level in tint as possible throughout, but extreme depth and hardness such as colour feeding gives are debarred. Any exhibit showing the effects of colour feeding will be disqualified.
Position and carriage 15	Semi-erect, standing at an angle of 60°. Gay and jaunty with full poise of the head.
Head and neck 10	<u>Head</u> : well rounded and neat when viewed from any angle, beak fine, eyes clear and positioned to rest on an imaginary line drawn as an extension to the line between the upper and lower mandible of the beak, very slightly forward of a central point of the head. <u>Neck</u> : in keeping with the head and flowing smoothly into the body lines and of sufficient length to give a free, jaunty look to the head carriage.
Wings 10	Compact and carried close to the body, covering the back, with primary and secondary flight feathers meeting at the tips. Outer flight tips to meet at the root of the tail. Primaries and secondaries to be pointed.
Plumage 10	Close, firm and fine in quality, presenting a smooth, silken glossy appearance, free from browiness, frill or roughness
Health and condition 10	Condition and cleanliness shall have due weight.
Legs and feet 5	Of medium length and showing just a little thigh, the legs should be fine yet in harmony with the size of the bird and allowing it to adopt a gay, jaunty stance. Feet in keeping with legs, both to be clean and without blemish.
Tail 5	Close packed and narrow, being nicely rounded and well filled in at the root.
Size 5	The ideal length from top of the head to tip of the tail is 14,6 cm. Length should be in proportion and balance with other features of the bird.

Show cage: Border type show cage with 2 round perches 14mm in diameter, 6 wires apart.

THE CRESTED - CRESTBRED

<p>Crest (Crested)</p> <p>Head and Neck (Crestbred)</p> <p>Beak Eyebrows</p> <p>50</p>	<p>Size and formation of the crest shall be the first consideration, a crest cannot be too large. It should consist of an abundance of broad, long and veiny feathers evenly radiated from a small centre, well over eyes, beak and poll. A good crest may be flat if well filled in at the back and without splits, but a drooping or weeping crest shall have preference.</p> <p>The Crest-bred should have a large and round head, broad at every part with a small beak and an abundance of long, broad feathers commencing at entrance of beak continuing over the crown and flowing well down the poll and should be well browed. In a good Crest-bred the feathers of the crown when turned over should reach the end of the beak, and the heavy brows should give the bird a sulky appearance without brushing.</p> <p><u>Beak</u>: small and neat. <u>Eyebrows</u>: heavy and overhanging.</p>
<p>Plumage Tail Wings Colour</p> <p>20</p>	<p>Tail short and narrow.</p> <p>Wings not extending beyond root of tail nor crossed at tips but fitting closely to the body.</p> <p>Feathers should be smooth and show no frillings on breast, cock feathers symmetrical on both sides of root of tail.</p> <p>All colours are allowed except red.</p>
<p>Shape Size</p> <p>15</p>	<p><u>Shape</u>: the body should in shape resemble that of the bullfinch possessing substance in proportion to its length, nicely arched, full and well circled chest, neck full and short.</p> <p><u>Size</u>: ± 17 cms</p>
<p>Condition</p> <p>10</p>	<p>Healthy and clean ; well used to the cage.</p>
<p>Feet Legs</p> <p>5</p>	<p>Short legs with thighs and hocks well set back.</p>

Show cage: Colour canaries type show cage with 2 round perches 14mm in diameter, 12 cm apart.

FIORINO

Size and Type 15	Maximum 13 cms. Well-filled and perfectly proportioned.
Head Neck 15	Crest: full round crest, symmetrical with a central point and eyes to be discernible. Plainhead: head round, with pronounced eyebrows. Neck: smooth-feathered, straight, well separated from the head and jabot.
Posture 10	Erect (55°), neck, back and tail to form a straight line.
Plumage 10	Silky and voluminous frills. Close fitting and smooth-feathered in all areas not assigned to frills.
Mantle 10	Voluminous, extending symmetrically over the full length of the back.
Fins 10	Voluminous, rising symmetrically well up towards the wings.
Jabot 10	Full and symmetrical, in the shape of a close-fitting shell.
Wings 5	Carried tight to the body, without crossing.
Legs 5	Long, with strong toes and claws.
Tail 5	Short and narrow, in line with the back. Cock feathers are allowed.
General condition 5	Clean and healthy. All colours are allowed.

Show cage: Border type show cage with 2 round perches 12 mm in diameter, 6 wires apart.

GERMAN CREST

<p>Crest 30</p>	<p>Crest to conform with the shape of the head, which must be oval . The central point to be small and distinct. Viewed from the side the crest covers part of the beak and extends onto the nape. The crest must flow smoothly onto the nape and must not present any bald patch. The eyes must remain discernible.</p>
<p>Colour 20</p>	<p>The colour must be as for Colour Canaries, being judged in accordance with the Coloured Canaries standard. No variegation is allowed. The crest on a lipochrome bird can be clear, dark or grizzle.</p>
<p>Type and Size 15</p>	<p>Type and shape is identical to the Colour Canaries. Wings to be carried close to the body, without crossing. Size to be between 13.5 and 14.5 cms.</p>
<p>Plumage 15</p>	<p>Even and close fitting to the body. The tail is narrow and slightly forked ; length to be in proportion with that of the bird.</p>
<p>Position 10</p>	<p>Alert, yet steady, standing at an angle of 45°.</p>
<p>Condition 10</p>	<p>Clean and in perfect condition.</p>

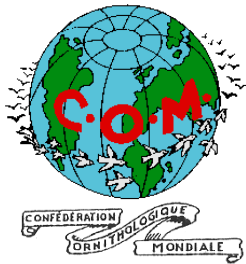

Show cage: Colour canaries type show cage with 2 round perches 12 mm in diameter, 12 cm apart.

Notes :

For Lipochromes : with the exception of the crest, no other form of variegation is allowed.

Formation of teams : different variegation is allowed on the crests which can be clear, dark or grizzled.

For Melanins : variegated birds are not allowed.

GIBBER ITALICUS

Position 15	In the form of a number "7", forming an angle of 90° between the body and the head and neck.
Head Neck 15	Head: small, slender, snake-like, smooth-feathered. Neck: long, smooth-feathered, projecting forward horizontally in a slight curve.
Legs 10	Long and stiff, perpendicular to the perch showing naked thighs.
Mantle 10	Small, symmetrical, close fitting and set well high over the shoulders.
Jabot 10	Limited to two small symmetrical frills in the shape of comas that curve inwards to the centre of the breast without meeting, exposing a naked upper breastbone.
Fins (Flanks) 10	Small, short and symmetrical, curving outwards to the wings without reaching the back.
Size 10	14 - 15 cms.
Wings 5	Long, close fitting to the body.
Tail 5	Long, narrow.
Plumage 5	Sparse, not too voluminous, well set, smooth-feathered on the underparts.
General condition 5	Well used to the cage, clean and healthy. All colours are allowed.

Show cage: Tunnel type show cage with 2 round perches 12 mm in diameter (1 above and 1 below) .

HARLEQUIN PORTUGUESE

Body (shape) Chest Wings 20	Long, thin and harmonious body. Slightly and uniformly rounded chest. Straight back, in the same line of the tail. Long wings, carried closed to the body without crossing, meeting just at the root of the tail.
Crest Head Neck 15	Crest (<u>“Arlequim Poupa” Crested Harlequin</u>) - Three-horn shaped crest (2 angles at the back and 1 virtual at the front) coming from the top of the head and then falling symmetrically without covering the eyes and the beak. Head (<u>“Arlequim Par” Pair Harlequin</u>) - Long and thin head, straightening the skull towards the beak. Beak - Strong and proportionate. Eyes - Bright and well visible. Neck – Well moulded, pointing out very clearly the head and body.
Size 15	16 cm.
Colour 10	Variegated, multicoloured with presence of the red factor. Balanced presence of melanin and lipochrome. Artificial colouring is obligatory.
Plumage 10	Compact, smooth, silky, glossy and adherent to the body.
Position Mouvement 10	Erect standing (55% angle) and haughty. Elevated body. Alert and jaunty, moving confidently.
Legs 10	Strong, long, slightly bent and preferably variegated. Well visible thighs.
Tail 5	Long, thin, slightly bifurcated at the tips, and preferably variegated.
General Condition 5	Clean and healthy. Liveliness and good adaptation to the show cage.

Show cage : Colour canaries type show cage with two round perches 12mm in diameter, 12 cm apart.

IRISH FANCY

ITALIAN GIANT FRILL (A.G.I.)

Head, Neck and "Raised Collar" 15	<p>The head is rounded and very voluminous, in the shape of a hood that can be full or partial. The head derives its shape from the very important and typical characteristic of the A.G.I. known as the "raised collar". Along the front, the "raised collar" blends neatly with the feathers of the neck and shaped in the form of a gutter. The feathers of the neck project upwards to form from behind, around the area of the nape, the "raised collar". The beak is conical with a wide base.</p>
Flanks 15	<p>Well developed and symmetrical, showing no looseness, with very fine and silky feathers that rise and curve to come alongside the wings.</p>
Size 10	<p>Minimum length 21 cms., with proportionate type.</p>
Plumage 10	<p>Soft and fine, very voluminous, neat. All colours are allowed.</p>
Mantle and Bouquet 10	<p>Composed of very broad and long feathers that part from a point on the center of the back and extend symmetrically towards the head and over the sides, to form a "rose-shaped" mantle. Fine and silky feathers, in the form of a bouquet, fall from the rump and over both sides to complete the mantle.</p>
Jabot and Abdomen 10	<p>The feathers on the jabot converge upwards from both sides, in a forward manner, forming a „fan’ that extends right up to the edge of the head collar, to show no cavity. From the abdomen, feathers project forwards and upwards to join up with the jabot, showing no cavities. The abdominal area appears very rough feathered.</p>
Tail 10	<p>Compact, very long with „square’ end, showing an abundance of long cock feathers and dense under-tail coverts.</p>
Position 5	<p>Erect with fearless carriage, standing at an angle of not less than 60°. The tail is carried in line with the body or slightly drooped.</p>
Wings 5	<p>Long and even, carried close to the body. Slight crossing of the tips of the wings is allowed.</p>
Legs 5	<p>Sturdy legs and feet, with strong grip on the perch. Corkscrew-like nails.</p>
General condition 5	<p>Active, clean and healthy.</p>

Show cage: Parisian Frill type show cage with 2 round perches 14 mm in diameter, 10 wires apart. The feeder to be placed on a slightly higher level than the perches.

LANCASHIRE

<p>Coppy</p> <p>Plainhead 30</p>	<p>The Coppy should be of a horse-shoe shape, commencing behind the eye line and lay close to the skull forming a frontal three quarters of a circle without any break in its shape or formation and should radiate from its centre with a slight droop. There should be no roughness at the back of the skull.</p> <p>The properties of the plainhead are the same as the Coppy, with the exception of the head. The head should be broad and rather long, with soft and plentiful feather.</p>
<p>Size 25</p>	<p>Long, full of substance 23 cms</p> <p>(The aim in breeding should be to keep and improve the size and length of the bird)</p>
<p>Position 15</p>	<p>Stand erect, easy and graceful.</p> <p>The tail should droop slightly giving the bird the appearance of having a slight curve from the back to the end of the tail.</p>
<p>Neck 10</p>	<p>The neck should be full, long and thick.</p>
<p>Body Plumage Legs 10</p>	<p>The back long and full, and the chest bold and wide. The shoulders broad. It should have plenty of feather, fine and soft. The wings should be long.</p>
<p>Condition 10</p>	<p>Perfect. Colours: clear, buff, yellow and white. No variegated except in Crest.</p>

Show cage: Tunnel type show cage with 2 round perches, 14 mm in diameter (1 above and 1 below).

LANCASHIRE

THE LIZARD

Spangles 25	<p>The series of small black spots which form the most essential characteristic of the Lizard.</p> <p>Each spangle should be clear and distinct and as black as possible.</p> <p>The spangle should extend from the edge of the cap in perfectly straight lines to the wing coverts, each successive spangle being progressively larger than the one nearer the neck.</p>
Feather-quality 15	<p>Should be fine and soft and should fit to the body closely and tightly with no suggestion of coarseness or looseness.</p>
Breast (Rowings) 10	<p>The rowings are the markings on the breast and flanks. They should be clear and distinct from one another and lineable.</p>
Ground colour 10	<p>The ground colour must show depth and evenness, distinct from the characteristic pattern of the markings.</p> <p>Rich yellow for Gold and warm buff for Silver, white for Blue.</p>
Wings and tail 10	<p>The wing feathers are compact and held closely to the body.</p> <p>Their tips meet in a straight line down the center of the back.</p> <p>They are so dark as to appear almost black. The tail is narrow, straight and neat, with feathers of the same colour as the wing feathers.</p>
Cap 10	<p>The head is fairly large, round and full on the top. The cap extends from the base of the upper mandible to the base of the skull and is oval in shape with clearly defined edges.</p> <p>A clear cap is one whose cap is perfectly clear. A broken cap is one where the light area of the cap is more or less broken by dark feathers in the defined oval shape.</p> <p>A non-cap is one where the light coloured cap of the crown of the head is entirely absent and is replaced by dark feathers of the normal pattern. Clear capped or non capped, cocks or hens, may all attain an equal standard and broken capped birds which are equal to the ideal in all respects other than the cap will lose only a proportion of the 10 points for the cap.</p>
Covert feathers 5	<p>The edging of colour on the feathers of the wing butts and covert feathers which should be black and distinctly laced.</p>
Eyelash 5	<p>A line of dark feathers passing above the eye of the bird and giving a good finish to the appearance of the cap.</p>
Beak, legs and feet 5	<p>The beak, legs and feet are dark.</p>
Steadiness, staging and size 5	<p>Steady and staged correctly.</p> <p>In perfect condition.</p> <p>Size not to exceed 12,5 cms</p>

Show cage: Colour canaries type show cage with 2 round perches 12 mm in diameter, 12 cm apart.

MEHRINGER

Size 20	13 cms.
Mantle and bouquet 15	<u>Mantle</u> : voluminous, falling symmetrically over both sides of a median line. <u>Bouquet</u> : the bouquet is a complimentary feathering, set at the base of the mantle between the wings, falling to the left or right.
Jabot and abdomen 15	The feathers from both sides of the breast curl towards the centre of the chest where they touch each other. The abdomen is likewise frilled.
Fins (Flanks) 15	The fins are set above the thighs, being voluminous and rising symmetrically all around.
Head, collar and side-whiskers 10	The head of the Mehringer is proportionately large and well frilled, in harmony with the rest of the body. The head is set in the shoulders, surrounded along its base by feathers that curl upwards to form a collar. The cheeks are well filled, with side-whiskers effect..
Legs 5	Short, with well feathered thighs.
Tail 5	The tail is broad and tight. Cock feathers show on both sides of the tail.
Position 5	Position is erect. The head, the back and the tail must follow a straight line.
Plumage 5	Voluminous and silky.
Condition 5	To be shown in the best state of health and cleanliness. All colours are allowed.

Show cage: Tunnel type show cage with 2 round perches 12 mm in diameter (1 above and 1 below)
